**The breakdown of rocks
by the action of rain,
snow, cold etc.**

**A country's coastline is
the outline of its coast.**

**The coast is an area of
land that is next to the
sea.**

**A structure that is curved
at the top and is supported
either side by pillars of
rock.**

**A narrow piece of land
which sticks out from the
coast into the sea.**

**The gradual destruction
and removal of rock or soil
in a particular area by
rivers, the sea or weather.**

**A small column of rock
left behind when the top
of a stack collapses.**

**A tall column of rock left
behind when the top of an
arch collapses.**

**A large hole in the side of
a cliff.**
