**stem**

**Flowers are usually colourful and attract insects and birds.**

**A deciduous tree loses its leaves each year.**

**Bulbs grow into new plants.**

**Petals are the colourful part of the flower.**

**Leaves catch sunlight to make energy.**

**Fruit contains the plant's seed.**

**The stem holds the plant up and carries the water and nutrients from the roots to the leaves and flowers.**

**Seeds grow into new plants.**

**Roots take in water and nutrients from the soil.**
